Agata & Me

Overnite EP

SOPA005 – SOPA - March 1, 2008

With origins in the Balkans and Sicily two southern europeans meet on a nordic winter night: melancholy strikes...

»Overnite EP« is the latest release by Sound Of Perpetual Astonishment. An eight-track EP by Agata & Me who recently joined the label.

Behind the band name you find a duo made up of Agata Foti of Sicily and Emir Pasic of Bosnia (and formerly of the »balkanpunk« band KURvE). They met up in Aarhus, Denmark, and started doing songs together. During winter the 2007-2008 they were immensely productive and put together a whole bunch of songs and eight of them have made it onto this cd.

»Overnite EP« features tracks where traditional songwriting, acoustic instruments and vocal harmonies by both singers intertwine with small doses of electronics and evocative droning loops. The lyrics dive into the deep emotional territory where you find the ups and downs of love and the feeling of alienation. A moving listening experience indeed.
